

Beep Science AS is a leading provider of mobile Digital Rights Management (DRM) software solutions, enabling exciting new digital content services around the world. Founded in 2000, the company has established itself as internationally recognised specialist within the field of Mobile DRM, and has world-class brands as customers. Beep Science develops and provides client & server DRM software based on open industry standards. Beep Science has its head offices in Oslo, Norway, and has a Research & Development site in Szeged, Hungary.

Our field of business is growing rapidly and we are looking for focused professionals to grow our winning team..

Product Manager (J2EE)

Beep Science is looking for an experienced Product Manager to drive the requirements for the Beep Science DRM Server product. You will be instrumental in specifying those requirements and guiding them through implementation, quality assurance and commercialisation. You will be directly involved in customer meetings and projects.

The Product Manager reports to both the CTO and VP of Business Development. You will work across the organisation, interacting with business development, product development, professional services, and sales.

The main responsibilities of the Product Manager are:

- Define feature requirements, prioritise them, and create technical specifications
- Maintain product documentation (user manuals, installation guides, presentations, etc)
- Conduct presentations, training sessions and product demonstrations towards customers
- Assist in the sales process, including writing technical RFQ responses
- Assist in the software development process
- Assist in Quality Assurance

The position will require the ability to travel globally to client sites.

Education

Bachelor degree in Engineering, Software Engineering, Computer Science or equivalent.

Background & Experience
