

Beep Science AS is a leading provider of mobile Digital Rights Management (DRM) software solutions, enabling exciting new digital content services around the world. Founded in 2000, the company has established itself as internationally recognised specialist within the field of Mobile DRM, and has world-class brands as customers. Beep Science develops and provides client & server DRM software based on open industry standards. Beep Science has its head offices in Oslo, Norway, and has a Research & Development site in Szeged, Hungary.

Our field of business is growing rapidly and we are looking for focused professionals to grow our winning team.

Senior JAVA Software Developer

Beep Science is looking for an experienced Software Developer to join our professional server-side engineering team, within a dynamic and international working environment. The Senior Software Developer will be instrumental in driving the design and implementation of the evolving Beep Science J2EE DRM Server. You will be working with a mature code base, optimising it for robustness and performance, as well as working to apply OMA Digital Rights Management to new and innovative service models.

In this role you will be a member of the core team developing the next generation of content protection technologies that are already being delivered to service providers the world over.

Education

Bachelor degree in Software Engineering / Computer Science or equivalent.

Background & Experience

Minimum of 6 years software development experience, with at least 3 year in JAVA/J2EE development.

We prefer candidates with a background in the following areas:

- Agile / XP development process
- JAVA and C++ Programming
- J2EE server development
- Object Oriented design & documentation
- Mobile Operator / Telecommunications
- Carrier/Operator grade server development

Interpersonal Skills

- Excellent written and verbal communication skills in English
- Think "outside the box"; keep in mind the big picture
- Take ownership and responsibility for excellence and quality in your own work
- Willing to mentor and coach peers

Preferred Skills

Knowledge in any of the following areas will be highly considered:

- Application Servers (JBoss, BEA WebLogic)
- Service Oriented Architecture (SOA)
- Databases (Oracle, MySQL)
- Secure Implementation (DDoS, etc)
- Cryptography (AES, RSA, PKI, OCSP)
- XML Schemas & DTDs
- Content Protection Technologies (OMA DRM, WM-DRM, 18Crypt, Marlin DRM, Coral, CPRM, DLNA, ISMACryp, SimulCrypt)
- Streaming technologies (MPEG-4, 3GPP PSS)
- Mobile Broadcast (DVB-H, T-DMB, OMA BCAST)
- Mobile Content Delivery (OMA Download, MMS)
- Public Key Infrastructure (PKI) and OCSP

Job Location

Your place of work will be Oslo (Norway).

International candidates are encouraged to apply.

How to Apply

For immediate consideration, please send your application in English to jobs@beepscience.com

Your application should include your CV and a cover letter highlighting your experience relevant to this position.
