

**Press Release**

**BEEP SCIENCE ANNOUNCES ITS EXPANSIONS OF COMMERCIAL OMA V2 DRM CLIENT SOFTWARE FOR LINUX, SYMBIAN AND WINDOWS XP OPERATING SYSTEMS**

*– Beep Science shows leadership in mobile Digital Rights Management by expanding its open standards compliant DRM product portfolio –*

**Oslo, Norway, 10<sup>th</sup> of April, 2005: Beep Science, the leading provider of mobile DRM (Digital Rights Management) solutions, today announced its new commercially available OMA v2 DRM Client software for Linux, Symbian and Windows XP operating systems.**

Beep Science shows its leadership in mobile Digital Rights Management (mDRM) by expanding its portfolio in open standards based DRM products. Beep Science continues its commitment to the Open Mobile Alliance (OMA) DRM standard.

The Beep Science OMA v2 DRM client product portfolio has in addition to its Symbian support been expanded to also include support for Linux and Windows XP. The OMA v2 DRM Client product is a full software solution enabling OMA v2 DRM compliant management of protected content. The complete software solution provides high security and robustness for deployment into a device platform or for integration with existing downloadable media manager/player applications.

Beep Science believes that the OMA v2 DRM industry standard represents an important corner stone in developing a digital content eco system, enabling secure content protection across any device, any content type and any distribution model. The OMA v2 DRM standard content protection provides new content distribution opportunities to all forms of devices, including advanced multimedia capable mobile phones, handheld palmtop computers, game consoles, PCs, consumer electronics devices, set-top boxes and so on.

“The availability of OMA v2 DRM client software is important driver for the OMA DRM take-up. Beep Science will continue its development in the client business area, having already

other platforms in development for commercial launch during 2005", announces Markku Mehtala, VP Business Development at Beep Science.
