## **Wiz4Com selects Beep Science Digital Right Management (DRM)**

### **Wiz4Com chooses Beep Science DRM solution for its global OEMs customers**

**Le Mans, France and Oslo, Norway – July 18, 2006** – Wiz4Com, a leading independent Design House and Beep Science, a leading provider of mobile DRM software, today announce Wiz4Com selects Beep Science to provide its DRM technology. Under the agreement Beep Science will provide open industry standard OMA DRM agent software to Wiz4Com.

Wiz4Com, a leading independent Design House with global and regional OEMs customers established on operator and retail markets, has selected Beep Science, a leading provider of mobile DRM software, as their DRM technology vendor. Under the agreement Beep Science will provide open industry standard OMA DRM agent software to Wiz4Com for its mobile platform used by major handset manufacturers. Wiz4Com also announces that the DRM enabled devices with Beep Science DRM agent embedded software will reach the market in Q3 this year, helping Wiz4com to strengthen its product portfolio towards operators market.

“We are pleased to announce our selection of Beep Science as our DRM technology provider. Beep Science has proven DRM technology and mature products meeting our customers’ requirements. Beep Science has also proven their leadership in DRM through their software architecture and project engineering capabilities, securing easy and efficient software implementation in customer projects,” says François Saint-Lu, Software Director at Wiz4Com.

“We are pleased to enter into a partnership with Wiz4com, the only independent Design House with a local presence on operators market where DRM has most of its appeal. The on-schedule and smooth implementation of our OMA DRM solution on Wiz4Com’s mobile software platform proves the portability of our solution,” says Jan Rune Hetle, CEO at Beep Science AS.

The DRM solution provided by Beep Science is fully compliant with the Open Mobile Alliance (OMA) industry standard. The Beep Science DRM Agent supports all content types, major operating systems and chipsets, paving the way for a healthy digital content ecosystem across devices and platforms. The Beep Science DRM Agent can be implemented on all types of connected devices for downloading and consuming DRM protected contents from online services.

## **About Wiz4Com**

Wiz4com Technologies SAS is a leading provider of end-end solutions for wireless handsets and related technologies, from the product definition stage to the product End of Life. The company not only designs and develops mobile phones, but also manages supply chain, new product introduction, after sales support, field test and certification.

Wiz4com has over 220 professional staff worldwide and established mobile phone design & development centers and sales offices in Europe and Asia. Over 27.5 million wireless handsets based on its designs have been shipped to date all over the world and distributed through both Operator and Retail channels, carrying major global and regional brands.
